Subscription: \$1.00 per year, in advance. Single Copy, 5 cents

STOP!

Before buying your Paper and Envelopes and Cards for Xmas, and see our stock first, anyway. We have dandy boxes of Stationery and Single Xmas Cards.

We have some very pretty and the latest thing in Blank Personal Greeting Cards and Paper with Envelopes to match, on which we can print your own particular Greetings. These come cheaper than the send-away-for Greeting Cards. Then our Boxes of Stationery and Single Xmas Cards are pretty. Cards from 5c, up. **THE ADVANCE**

Banking Confidence in Alberta's Future

Thirty-three years ago we commenced business in Alberta, winning the distinction of being the first bank to establish in this Province. It was at once an expression of our confidence in the future of Alberta; a confidence that has been borne out by our rapidly-expanding system in an effort to extend the fullest possible measure of banking accommodation.

UNION BANK OF CANADA

CHRISTMAS GREETING CARDS

YOU can greet all your friends at a minimum cost by sending Christmas Cards

Call in and see our Specimen Book of Christmas Cards. Order now so as to have plenty of time to send to friends at a distance. We will also have on hand a full line of

Christmas Greeting Cards and Papeteries

at reasonable prices, which will make suitable Christmas Gifts

We will have some very pretty Cards and Paper specially suitable for Greetings, on which we can print any design. See them.

THE ADVANCE

BREEZELETS

Farmers of Alberta are being recommended to keep a flock of sheep on their farms.

Perhaps it is as well to have a change, anyway. The farmers have been the goats long enough

Canadian whisky in large quantities is being imported by Great Britain.

If the exported Canadian whisky is anything like some of the stuff served out in Alberta, the British boozier will get some idea of what the Canadian skunk is like.

Should the state interfere in affairs of the heart and prevent marriage unions between persons who are not physically fit to either reproduce healthy children or maintain themselves without assistance from charitable or state sources?

"Love laughs at locks and bolts" has been proved over and over again, and love will have the laugh on the state—except the marriage state.

More or less, the City of Calgary has had trouble with the Natural Gas Co.

It looks as if at no distant date that the trouble was going to be amicably settled and the hatchet buried—by the supply of gas petting out.

"Many prominent people are dead," says a news head.

And, remarked a Chinook citizen, "I do not feel very well myself."

"How to get a cork from inside a bottle," is the heading of a short article in Monday's paper.

It greatly depends on what is inside the bottle besides the cork—if bug-juice smashing the neck of the bottle would doubtless release the cork.

"Ottawa aroused; looks for cause of sleeping sickness," says a news heading.

Ottawa won't have very far to look—if they turn their attention to the senate.

Over from England the report comes that "Canadian whisky is hard to identify."

Evidently in England they do not know the difference between a brand of Canadian bug-juice and Limburger cheese.

The more we learn about the Alberta feed situation the more certain it appears there has been bungling.—Calgary Herald.

And in the meantime, valuable animals are dying of starvation.

Sheep on Every Farm

Owing to the snow blizzard and the very cold weather on Friday evening, the agricultural institute meeting, in the Chinook C. S., under the auspices of the Chinook agricultural society, was not so well attended as it would otherwise have been.

Jas. McCaig, M.A., LL.B. of Edmonton, was the principal speaker, and J. A. McColl, M.L.A.

The topic of both speakers was confined chiefly to farmers keeping a flock of sheep on their land.

Mr. McColl said that he has very little to say about sheep, but he had been turning the matter over in his mind very carefully for some time and felt all will agree with him that the methods of farming in the district would have to undergo a change. The farmers did not want and did expect the government to keep on assisting them in the way it has been doing in the past.

He felt that cattle and horses with the limited feed available could not be raised in sufficient numbers to pay. There is generally some stock in any country that is adapted to the country more than others, and if the farmers were going to stay here they wanted to live in good homes and in comfort. It was a mistake to think of moving out. They had splendid soil and climate and the district had many good qualities.

After considering these conditions he had come to the conclusion that farmers should go into sheep, not heavily, but gradually, to see how well they are adapted to this country. There were several benefits to be considered. The only way to clear out weeds was to have sheep, as there were few varieties of weeds that the sheep would not eat.

Mr. McCaig said that wheat was the ideal dry land crop, and it was not practical to run stock in a country fenced off with barbed wire, yet there were 300,000 sheep run between the wire fences of dry farmers in southern Alberta. They were the only stock that could take advantage of the short bite. This was the stock that was most economical and gave the quickest returns.

Sheep would yield two crops between now and next October, and he who would make the best success on his farm was the man who would use up his straw and practice economy.

Sheep have held up better in price than any other class of stock, and for many years there had been no break in the price of mutton; the reason for which was that they were not producing a surplus. The profit on mutton was better and quicker than on

(Continued on page 8)

LOCAL CURLERS

Curling got off to a good start Wednesday night of last week, when the first game of the President vs. Vice-President took place. In this event there were eight rinks aside, and to date all games, except the Todd-Milligan game, have been played. Vice-President Deman's aggregation leads President Miller's rock heavers by 18 points, but as Todd comes from Scotland where curling was first instituted it is expected that he will "crack an egg" on Milligan's pets, and overcome the Vice-President's lead. The losers play for an oyster supper.

A new schedule has been commenced, following are the personnel of the rinks:

Gordon, Robinson, Milligan, Dell, skip

Spencer, Mitchell, McKenzie, Smith skip

J. Clark, Pollock, Lee, Deman skip

McLean, Ormond, H. Smith, Whitlock skip

Taylor, Elliott, Engler, Miller skip

R. Clark, Johnson, Hewitt, Woodruff skip

Carter, Meade, Whiteside, Rennie skip

Egbert, Cruickshank, Key, Wylie skip

Cosley, Stata, Yake, Dunn skip

Stewart, Lawrence, Briggishaw, Dawson skip

Paul, Vanhook, Foster, Stephenson skip

Monday night Dell defeated Stephenson, Miller defeated Deman, Woodruff defeated Chapman and Wylie defeated Dunn.

Tuesday night Rennie defeated Smith, Dawson defeated Whitlock, Dell trimmed Deman, and Stephenson administered the same medicine to Miller.

These games start at 7 and 9 p.m. every night, and the public are welcome to watch these games any evening.

The Chinook club has sent a challenge in for the Beaver Cup. This will probably be played around Xmas.

J. R. Miller is offering 4 boxes of those beautiful red juicy O.K. Brand Apples to the winning rink of the present curling schedule. This competition should be completed Dec. 23rd. Who gets the apples for Xmas?

A heartfelt welcome was extended to 56 of the returned soldier boys in the Cereal district by the Prairie Circle W.I. The entertainment took the form of a splendid banquet, after which a dance and program was the order of the evening, the veterans helping in giving a most enjoyable programme. A purse of \$100 was handed the local G.W.V.A.

Collingwood Council

RELIEF GIVEN

The 10th meeting of the Council of the M.D. of Collingwood, held at Collingwood school-house, Sept 27th.

Members present: Messrs. Hittle, Kinch, Falconer, Walter and Harrington.

Kinch, that Chas Tooth be relieved of the obligation of paying out of this year's crop for the seed grain furnished to him last spring, providing he give a lien on next year's crop for amount owing, and that the same privilege be extended to F. Rutherford.

Walter, that the amount owing to the village of Chinook for hospital dues for Harry White be paid, \$24 at once and the balance of \$26.51 as soon as payment is received by municipality of balance of amount charged to Mr. White.

Harrington, that Dr. Paul be appointed as medical health officer of the municipality, salary at the rate of \$50 per year.

Harrington, that the following relief be given to Olie Anderson of the e h 10-26-8 w 4:

Flour 16.00
Coal 66.00
Feed oats 74.00

Hittle, that the following relief be given to K. Bjork of the e h 21-26-8 w 4:

Flour 11.00
Coal 44.00

Falconer, that Wm Tooth be given relief as follows:

Flour 22.00
Potatoes 20.00
Coal 68.00

Hittle, that R. Peyton be given relief as follows:

Feed 100.00
Kinch, that A. E. Mannen be given relief as follows:

Flour 16.00
Coal 64.00

Following bills ordered paid:

Lorne Proudfoot, Sec.

Don't delay longer ordering those Christmas Greeting Cards so as to have plenty of time to send to your friends. Drop in at the Advance office and see our specimens.

The Duty of the Hour

The time is at hand when the people of the Western Provinces of Canada have important obligations, imposed upon them by their citizenship, to discharge. Primarily it is a duty they owe to their country, but in a very particular sense it is a duty they owe to themselves.

The reference is to the selection of municipal councils and school boards for the coming year, the making of a choice of some thousands of men or women to whom is to be entrusted the vitally important task of directing municipal and school administration in a territory many times the size of some outstanding European nations.

The matters which in the coming year will engage the attention and call for action on the part of these local representative bodies may not be very spectacular or fill a large place in the public eye or in the columns of the newspapers, but to an even greater extent than many matters of national and even international moment they directly affect the well-being of the people, and to the extent that these purely local affairs are well managed, the comfort, convenience and advancement of the people of a community are served. Furthermore, they have a very direct bearing on the burden of local taxation to be imposed.

Never, it is probably safe to say, in the history of this country was it a matter of greater concern than it is today that the keenest interest should be taken by all citizens in the choice of the men and women selected by them to serve in a representative public capacity. Western Canada is by no means immune from the unrest which prevails throughout the world, and which is turning some countries and old established conditions topsy-turvy. Problems connected with labor, education, social and moral questions, trade and commerce, finance and taxation—all are in the melting pot, and what will ultimately evolve therefrom for the good or evil of mankind depends to a very large extent upon the interest displayed by the average man and woman in public affairs, the amount of study and consideration they are prepared to give to reaching a solution of these problems, and the character of the men and women whom they elect to public office to deal with them.

It is of the utmost importance, therefore, that the people of Western Canada should give serious heed to the selection of their municipal and school representatives this year. In making choice of these representatives this is a time above all others when people should be on their guard against being swayed by feelings of personal friendship or the one hand, or feelings of a personal dislike on the other hand, in voting for candidates for public office. It is a time when all old partialities should be buried and forgotten, when considerations of race, or creed, or personal ambition should be ignored, and when the test of a cool and mature judgment should be applied in the making of a ballot.

Compared with most countries, Canada has weathered the first full

year since the signing of the armistice fairly successfully. Mistakes have been made, plenty of them. There have been unfortunate disturbances in industrial centres, injustices have existed, and yet remain to be righted. Much money has been wasted, and extravagance has been all too general, not only by governments and other public bodies, but by the people themselves. Nevertheless, when consideration is given to conditions in other lands, Canadians can regard themselves and their country as occupying a favored position.

It is to our own interests, as well as a duty we owe to our country, that this position should not only be maintained, but that it should be improved. Such improvement is not to be brought about solely in Dominion and Provincial politics, but the principal field of endeavor is to be found in local affairs, namely, in the municipality and local school district. It is here that the foundation of reform and progress is to be laid, and from careful and wise administration in these branches of our public business there will flow an influence which will beneficially affect administration in the larger, and what are popularly regarded as the more important, departments of government.

A lively interest in local matters throughout the Prairie Provinces at this time cannot fail to result in an improvement in all municipal and school administration, which, in turn, will lead to better Provincial government and more careful handling of Federal affairs.

WHEN NEURALGIA ATTACKS NERVES

Sloan's Liniment scatters the congestion and Relieves Pain

A little, applied without rubbing, will penetrate immediately and rest and soothe the nerves. Sloan's Liniment is very effective in allaying external pains, strains, bruises, aches, stiff joints, rheumatism, neuralgia, sciatica, muscular twinges.

Keep a big bottle always on hand for family use. Druggists everywhere. 35c, 70c, \$1.40—Made in Canada.

Sloan's Liniment Keep it handy

Alberta Horses Go to Scotland One of the largest shipments of pure-bred horses from one breeder in Canada was a recent one of 70 head of Percherons from the well-known Bar U Ranch in Southern Alberta, owned by Geo. Lane & Co. In addition to the pure breeds, eight high-class grades were sent to Lord Minto, when all old partialities should be buried and forgotten, when considerations of race, or creed, or personal ambition should be ignored, and when the test of a cool and mature judgment should be applied in the making of a ballot.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

For Colds, Pain, Headache, Neuralgia, Toothache, Earache, and for Rheumatism, Lumbago, Sciatica, Neuritis, take Aspirin marked with the name "Bayer" or you are not taking Aspirin at all.

Accept only "Bayer Tablets of Aspirin" in an unbroken "Bayer" package which contains complete directions. Then you are getting real Aspirin—the genuine Aspirin prescribed by physicians for over thirty years. New made in Canada.

Handy tin boxes containing 12 tablets cost but a few cents. Druggists also sell larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer."

Aspirin is the trade mark (registered in Canada) of Bayer Manufacturing of Monrovia, California, U.S.A. While it is well known that Aspirin is made by Bayer Manufacturing, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Port Arthur to Get Pulp and Paper Industry

Initiating A New Industrial Era For The Lake City

Announcement has just been made of the completion of arrangements for the establishment at Port Arthur, Ontario, of a pulp and paper industry with an investment of five million dollars. The company is to be known as the Great Lakes Pulp and Paper Company. The President is Lewis L. Alstead, of Appleton, Wisconsin. Associate with him are George Seman of Chicago, one of the biggest pulp and paper men in the United States, and James Whalen of Port Arthur, who established the Port Arthur Shipbuilding Company and the big pulp industries of the Whalen company in British Columbia. The plant will cover one hundred acres. The ground wood mill is to have a capacity of 30,000 tons per year, the sulphide mill 75,000 tons, and the newsprint mill 35,000 tons. The engineer in charge of construction will be Hardy, Ferguson of New York. A contract has been signed with the Ontario Hydro-Electric Power Company for the use of a minimum of 12,000 horsepower. The commission is now developing Nipigon to supply this power, the development having been undertaken with this industry particularly in view. The advent of Nipigon power and the large consumption of it already arranged for means a very low price and is regarded by the citizens as initiating a new industrial era for Port Arthur, especially as other kindred industries for the development of the districts natural resources are already said to be in sight.

\$100 Reward, \$100

Cataris is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous membrane of the system. HALL'S CATARRH MEDICINE destroys the foundation of disease, gives the system strength by improving the general health and assists nature in doing its work. \$100.00 for any case of Catarrh. HALL'S CATARRH MEDICINE fails to cure. Refund. Testimonials free. E. J. Cheney & Co., Toledo, Ohio.

"For Valor"

A Reward for Spending Eighteen Months in the German Naval Bases

How many have heard during the past five years of the King's Watch—one of the most highly-prized of all decorations that the King of England can bestow? Obtainable only by members of the British Secret Service, it has been won during the Great War by upwards of a dozen men.

At a glance just an ordinary good hunter, it bears inside the cover the inscription: "For Services Rendered—George," in a facsimile of the King's handwriting.

A certain naval officer, who is one of the envied dozen referred to, received the watch as a reward for spending eighteen months in the German naval bases at Kiel and Wilhelmshaven. An excellent linguist, he mixed freely during that time with the Hun sailors, transmitting to England knowledge that was invaluable.

Fish hooks have been made on exactly the same design for two thousand years.

EVIL OF SUBSTITUTION

A dealer substitutes because he makes more profit on an inferior article. A local citizen was induced to take a substitute for Putnam's Corn Extractor, with the result that the substitute burnt his toes and failed to cure. Putnam's contains no acid and is guaranteed. Always get Putnam's Extractor, 25c, at all dealers.

Sell English Estates

Large Land Owners Are Forced to Retrench by High Taxes

England is changing hands because taxes are so high that landed proprietors cannot afford to own and maintain their estates, according to accumulating evidence of the last few days.

"The crushing taxation which has resulted from the war," said the notice sent by the Duke of Rutland to his tenants, "coupled with the great rise in the price of all commodities and labor, has placed such burdens on my property as to compel me largely to diminish the size of my estate." The Duke of Rutland sold his Harby estates in the vale of Belvoir, much to the regret of his tenants.

Brig-General William Strong, of Thorpe Hill, Peterboro, is another landed proprietor who is parting with his property. Property of this class is being bought by the wealthy who made their fortunes during the war.

The largest and highest cactus in the world is found in Arizona. It is two hundred and thirty-two feet in height.

CATARRH COLDS BRONCHITIS CURED WITHOUT DRUGS

Tobacco Revenue

Fragnant Weed Furnished \$2,767,685 in October

Inland revenue returns for October show an increase of slightly over half a million, as compared with October, 1918. The excise tax on tobacco is now the largest source of revenue for this department, the amount collected during October being \$2,767,685, whereas the tax on spirits, liquors and malt-brought in only slightly more than \$800,000. War revenue stamps yielded \$1,103,497 for the month.

It is hard for some men to say just what they mean, but harder for others to mean what they say.

CARBON!

Rid System of Clogged-up Waste and Poisons with "Cascarets."

Take carbon clogs and clogs a motor, so the excess bile in the liver, and the constipated waste in the bowels, produce loggy brains, headache, sour, acid stomach, indigestion, colds, sleepless nights, and bad looks.

Let gentle, harmless "Cascarets" rid the system of the toxins, acids, gases, and poisons which are keeping you upset.

Take Cascarets and enjoy the nicest, gentlest laxative-cathartic you ever experienced. Cascarets never grip, sicken or cause inconvenience. They work while you sleep. A box of Cascarets costs so little too.

Heavy Cattle Shipments

Cattle shipments during the present fall from Wainwright, Alberta, and district are larger than any previous year, writes a correspondent. A conservative estimate would be that from ten to fifteen thousand cattle have been shipped from Wainwright to Eastern Canadian and American markets during the past few months.

The shipments to Edmonton and Winnipeg markets have also been heavy, one thousand head of good sound stock going out in one week.

Organization to Protect Birds

Organization for the protection of migratory birds in the Maritime Provinces under the convention between the Dominion and the United States has been begun with the appointment of R. W. Tufts, of Wolfville, Nova Scotia, as migratory bird warden. A staff of assistant wardens will work under Mr. Tufts, who is probably the best authority in the Maritime Provinces on bird life, and is the author of "Birds of the Grand Pre Region."

The highest interest that can be charged for a lot in the Isle of Man is six per cent, and that has been the lawful rate for more than two hundred years.

Minard's Liniment Cures Diphtheria.

On the approach of a thunderstorm French peasants often make up a very smoky fire, in the belief that safety from lightning is assured. By some this is deemed superstition, but the custom is based on reason, inasmuch as the smoke acts as a good conductor for carrying away the electricity.

W. N. U. 1292

Valuable Entomological Circular Issued

Collecting and Mounting of Insect Collections Important Part of the Work of Students

The collecting and preserving of insects and the mounting of insect collections has become an important part of the work of the students in many of our schools. The teachers who have specialized in agriculture have learned something of the methods of collecting and preserving insects and are arousing the interest of their pupils in this fascinating subject. In order to assist those desirous of securing accurate information Entomological Circular No. 12, "Directions for Collecting and Preserving Insects," has been prepared by J. H. McDunnough, M.A., Ph.D. This circular may be obtained free, upon application to the Publications Branch, Department of Agriculture, Ottawa. It indicates concisely some of the most essential features in connection with the collection of insects, and aims to arouse an interest for intelligent collecting of insects. Insects are very delicate creatures and unless the greatest care is observed in both collecting and packing for shipment an otherwise valuable collection may be rendered practically worthless from both the aesthetic and the scientific standpoint.

The piper plays the pipes, but the plumber gets the plums.

A Remedy for Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work of the ear. Dr. Thomas' Eucalypti Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will work wonders in relieving pain.

Hard to Beat

A carload of flax was sold at Winnipeg recently to agents of the British Government for \$8,332. According to Grain Exchange officials, this is the most valuable car of grain ever sold in Winnipeg. The price per bushel was \$4.46.

There may be other corn cures, but Holloway's Corn Cure stands at the head of the list so far as results are concerned.

Re-opening an Old Canal

Remarkable Waterway Is the Grand Canal of China

A movement is on foot again to make navigable the longest canal in the world. This remarkable waterway is the Grand Canal of China, which reaches from Hangchow to Tientsin and has in its time been navigable for nearly 1,000 years. Its journey between the cities carries it across two of the world's largest rivers, the Hwang and the Yangtze, but it is a long time since any junk has been able to go by canal from city to city. After about 130 miles north of the Yangtze, the Grand Canal has become choked with mud and abandoned. The present plan, which involves an expenditure of about \$7,000,000, will restore 100 miles of the Grand Canal, and may reasonably be regarded as the first step toward making the waterway navigable over its entire length.

FREE OFFER

Here's the biggest photograph bargain ever offered—a magnificent cabinet photograph of choice artistic design, standing 41 inches high, finished in mahogany or fumed oak, equipped with extra heavy double spring motor which plays three 10-inch records in one winding, universal tone arm that PLAYS ALL RECORDS, 12-inch turn-table, permanent jewel needle, all exposed parts heavily nickel-plated—for ONLY \$79. Shortage of Coal May Be Serious

Ottawa.—Canadians can now look forward to a shortage of soft coal supplies for some time, in the opinion of C. A. Magrath, Dominion fuel controller, who has just returned from Washington.

In view of the breaking off of negotiations between the miners and operators there can be little hope of amelioration of the situation for some time.

Previous to receiving the announcement of the breach at Washington, Mr. Magrath, who had been in conference with the fuel administrations of Ontario and Quebec, issued a statement calling attention to the gravity of the soft coal situation and urging the most rigid conservation policy. On being informed of the new development across the border, he called attention to the fact that he had anticipated that the award might not be acceptable to either miners or operators, and said that now the utmost care with our present supply would be necessary.

Huns Still in Truculent Mood

Preacher Spoke of Returning to War and Fighting for Honor

Berlin.—The presence of General Ludendorff, former first quartermaster general in the imperial navy of the Potsdam garrison church, during a memorial service for Germans who fell in battle, was the occasion for a striking demonstration. General Ludendorff spoke for military training as an invigorating and moral education.

One of the congregation, dressed in a field-grey uniform, rose and exclaimed: "When the hour comes we will all follow you, general," whereupon the whole congregation stood and sang "Deutschland über Alles."

In the course of his sermon the preacher said:

"When the time comes we shall die bravely for our brothers and our honor and not disgrace ourselves."

At the close of the sermon, the preacher, standing on the tomb of Frederick the Great, summoned the congregation to unite in creating a monarchy which would be supported by the will of the people.

General Ludendorff was given an ovation as he left the building, and cheers also were raised for former Emperor Wilhelm.

To Reduce G. T. Service

Due to Coal Shortage, 90 Trains Will Be Cut Off in Ontario

Toronto.—Ninety trains are to be cut off the Grand Trunk railway service in Ontario as a result of the shortage in soft coal consequent on the strike in the United States. The G.T.R. company announces that the reduction will go into effect Nov. 30. There will be nine trains less than usual running out of Toronto when the cut in the service takes effect.

Visit of Prince Strengthens Bonds

Ottawa.—His Excellency the Governor-General has received the following message from His Royal Highness the Prince of Wales:

"H.M.S. Renown, Camperdown N.S., Nov. 25, 1919:

"To all the men and women of Canada, who served at the front in the great war:

"On sailing from the Dominion after my first visit, I wish to tell you what a pleasure it has been to see so many thousands of you during the last six months. On behalf of the King, I congratulate you on your splendid war services, and for myself I thank you for having received me not only as the Prince of Wales, but as an old comrade in the field. I shall always look upon you as comrades, and I hope you will do the same for me. Au revoir.

(Signed) "EDWARD P."

Premier Borden has telegraphed as follows to His Majesty the King:

"At the conclusion of the visit of His Royal Highness the Prince of Wales to the Dominion may I be permitted to convey to your Majesty and to the Queen my very warm congratulations upon its remarkable success, and especially upon the wonderful impression which the Prince has made upon all our people. His labors have been indefatigable and untiring; his tact and courtesy have been un-

To Arraign 16,000

Communists

Czerny Is First to Be Tried and Pleads He Carried Out Orders

Budapest.—The trial of communists charged with crimes during the Bela Kun dictatorship has begun, Czerny, commander of the Lenin boys, being the first of 16,000 to be arraigned.

Czerny pleaded that he had only performed his duty. He denied many charges of his execrations and recited several instances in which he claimed Bela Kun gave direct and explicit orders for murders. As the Hungarian Bar association refused to defend the accused, the court ordered lawyers present in the court room to defend them.

First League Meet

To Be Called By the President of the United States

London.—Questioned regarding whose duty it would be to summon the first meeting of the assembly and the first meeting of the council of the League of Nations, in view of the fact of the American senate's refusal to ratify the Versailles treaty, Mr. Lloyd George said that Article 5 of the Peace Treaty stipulated that the President of the United States should summon the meeting. He added that he did not understand that this was in any way affected by the refusal of the United States senate to ratify the treaty.

Another inquiry, made by James Hodge, advanced radical and Scottish Home Rule member for Edinburgh, was whether Mr. Lloyd George gave any undertaking to President Wilson during the peace conference that Mr. Lloyd George would endeavor to settle the Irish question. This brought a direct negative reply.

Answering still another question, the Premier said that the effect of the United States senate's action with regard to the treaty provisions for plebiscite and other commissions in Germany would only be indirect. It would be necessary for the other powers to find a larger quota of representatives for these commissions.

The Premier said that the Anglo-French-United States treaty, providing for the defence of France, in case of Wanton attack, was contingent upon ratification by the United States senate, but that the United States refusal to ratify the Peace Treaty would not necessarily affect the tripartite treaty, provided the United States ratified the tripartite part separately.

A Wise Boss

Employer (to clerk): If that bore, Smithers, comes in, tell him I'm out—and don't be working, or he'll know you're lying.

Cheques Totalling \$4,000 Forged

Daring Crime Perpetrated on the Calgary Branch of the Standard Bank

Calgary.—One of the most daring cheque forgeries in the history of the city was perpetrated on the local branch of the Standard Bank here when a man, who said he was G. Whittaker, passed cheques totalling \$4,000 and drawn on the branch at Fort Saskatchewan, Alta. He represented that he wanted the money for stock deals. The cheques were stamped "accepted," but apparently were not initialed in the stamp mark. This passed unnoticed for a time, when the teller became suspicious. The bank manager communicated with Fort Saskatchewan and discovered the forgery. The police have been unable as yet to trace the man.

A Fine Plan

Lord Leverhulme Urges Sweating of Machinery Instead of the Employees

New York.—Sweating the machine, not the man, is the economic principle on which Lord Leverhulme, the great British manufacturer, justifies the six-hour day for workmen and the twelve-hour day for machinery. This schedule his firm has determined to introduce in their factories in Great Britain, Canada, and the United States, hoping thereby to profit their workmen and themselves.

Lord Leverhulme, who arrived here Tuesday on the Mauretania, comes to conduct a little missionary work in favor of the introduction in this country of the plan, which he declares will prove economically advantageous and profitable in any industry in which the overhead charges for plant and equipment equal or exceed the wage bill.

Describing the main features of the plan, as well as of the long established system of "co-partnership," or profit sharing, in his several soap factories, Baron Leverhulme pointed out that the scheme for hours must not be confounded with a flat six-hour day, but consisted in employing his working forces, men and women, in two shifts, each working on a 36-hour week basis, while the machinery is kept going the full twelve hours a day.

The plan, he declared, was to get the greatest possible production out of the machinery, the expensive element in soap production, which is granting the working forces a shorter day and a greater opportunity for recreation and self-improvement.

Bumper World Crops

Corn, Potatoes, Barley and Sugar Beets Are Above the Average

Washington.—Bumper world crops of corn, potatoes, barley, sugar beets and rough rice for this year are shown in estimates compiled by the International Institute of Agriculture at Rome, made public by the Department of Agriculture.

The production of wheat, oats and flax seed, however, shows a decrease from the average for the five years ended in 1917.

Wheat production in fourteen countries, excepting the central powers, will reach 2,040,000,000 bushels, 96.5 per cent of the five-year average. Corn will amount to 3,126,194,000 bushels, 14.8 per cent greater than the crop produced last year and 4.4 per cent greater than that produced for the last five years.

The Victory Loan

Ottawa.—Sir Henry Dutton, minister of finance, when questioned in regard to the allotment of the Victory Loan subscriptions, said that he would wait until the figures are all in before making a statement. He intimated that the government is in need of money to carry on the business of the country. A large percentage of the subscriptions will be accepted.

Two Deaths from Sleeping Sickness

Winnipeg.—Sleeping sickness has claimed two more victims in Winnipeg, making the total deaths from this disease since the first appearance eight in all.

Two more cases were reported to the city health authorities, bringing the number of cases reported to 32.

To Equip Seized Hum Steamers

New York.—More than \$7,000,000 will be spent in special equipment for the seven former German passenger liners recently enrolled by the United States shipping board for a fast passenger and mail service between the United States and South America.

"Funny how some fellows get generous when they are drunk."

"Yes, and others get tight."

Allotment of Coal For Canada

Emergency Requirements Will Be Met With Shipments From the U.S.

Washington.—Arrangements were completed here between the Canadian war mission in Washington and the central fuel committee of the United States, under which there will be an allotment of bituminous coal to Canada to meet emergency requirements.

The procedure in securing supplies will be as follows: "Preferred industries in Canada must have their applications substantiated by C. A. Magrath, Ottawa, afterwards the applications will be forwarded to the Canadian war mission at Washington, and by this mission in the central fuel committee."

G. T. Agreement Ready Soon

Will Be Taken to England By Sir Alfred Smithers When Completed

Ottawa.—The agreement which is being drawn up for submission to the Grand Trunk shareholders, and which is based upon the bill for the acquisition of the Grand Trunk system put through the House last session, will probably be completed within a few days. It will then go to the cabinet and on being approved by that body will be handed to Sir Alfred Smithers, who will take it with him to England.

The agreement, it is said, will contain little that is new. It is in the nature of a compact for the purpose of implementing the bill which parliament passed last session, and which covered the important point of the transaction.

The agreement is more specific, dealing with details of the plan broadly outlined in the bill. Until it is ratified by the Grand Trunk shareholders, there will be no appointments made either to the board of arbitration or to the board of management. The government, however, will continue preparing the case which it will place before the arbitrators, and which will require an exhaustive investigation into the condition of the road, and an audit of the books of the company. There is as yet no indication of who will be chosen to act for the government as counsel during the arbitration proceedings. The return of the Prime Minister may have the effect of speeding up the choice of the government counsel.

Bolshevik Will Settle Debts

New York.—The Bolsheviks do not intend to repudiate \$100,000,000 worth of bonds issued by the imperial and provisional governments of Russia, as reported, according to Ludwig K. A. Martens, self-styled soviet ambassador to the United States. Martens testified his government had sent him official authorization to arrange for settlement of outstanding bonds, a large portion of which were sold in this country.

Austrian Nobles as Hostages

Paris.—A dispatch has reached the Foreign Office from Vienna, by way of Basel, to the effect that the Russian soviet foreign ministry intends to hold the Austrian nobles and subjects in Russia as hostages for the security of Bela Kun, the former Hungarian communist leader, and the members of his government.

First Canadian in France

Kingston.—Among those who were initiated a few days ago into the Army and Navy Veterans was Capt. Law, C.A.M.C., who was the first Canadian to set foot in France after Canada had entered the war. Capt. Law landed in France in November, 1914.

Egyptian Situation Improved

London.—The imposition of stricter regulations in Egypt has resulted in an improvement in the tone of the native press, and the situation generally, according to a dispatch from Cairo under last Friday's date. Demonstrations have been banned after the midday prayer, the dispatch adds.

Soviet Peace Feelers

London.—A Moscow wireless dispatch received here quotes the Pravda as declaring that the Soviet government is willing to negotiate a peace with the entente and the imperialists, but only on condition that the entente shall undertake not to support the counter-revolutionaries.

Cannot Part With Title

London.—A bill introduced in the House of Commons, under which Viscount Astor would have been able to give up his title, inherited from his father, the late Viscount (William Waldorf) Astor, was defeated by a vote of 169 to 56.

W. N. U. 1292

No Prohibition Likely For Britain

Italy Will Observe

Conference Decision

To Carry Out Request of Allies With Regard to Dalmatia

Basel.—A dispatch from Belgrade, dated November 25, has been received by the Labach (Austria) correspondence bureau, stating that the Italian government has informed the government of Jugo-Slavia that Italy would observe the decision reached by the Paris peace conference with regard to the Dalmatian question and would itself prevent any attempt in the direction of Spalato by Gabriele d'Annunzio.

Trappers Predict

Early Spring

Rabbits Are Still Brown and Fur Trapped Is Not Prime

Winnipeg.—Coming into the rigid atmosphere of this city, travellers from the Peace River district are talking of the break-up of the winter there and early plowing, too. They say that ice on the river has broken, although it has been so thick that teams had been crossing for ten days, and old-timers predict the river will soon be clear. Trappers talk there of an open or a very late winter, drawing their conclusions from the fact that rabbits are still brown, and that fur trapped to date is not prime.

Credit Churchill With Tank

Being Servant of the State, Minister Is Not Given Financial Reward

London.—"It was primarily due to the receptivity, courage and driving force of Winston Spencer Churchill that the general idea to use such an instrument of warfare as the tank was converted into practical shape," was the statement made in the report issued here by the committee which investigated at great length the numerous rival claims to credit for inventing the tank. But it was said in the report that as the minister was considered a servant of the state he is not entitled to any reward.

The report then deals with a number of men who made valuable contributions toward perfecting the tank, awarding some of them sums of \$2,500 or \$5,000 each, the principal award, amounting to \$70,000, being divided.

10,000 Tons of Sugar Arrives

Montreal.—With the arrival in port of two government steamers loaded with Cuban sugar, and the expected arrival at the end of the week of a third sugar cargo, making in all a total of 10,000 tons to arrive in Montreal, the sugar shortage is greatly relieved.

Papa: Generally a fellow who can produce anything except results.

Radical Reforms Are Forecasted by Drury

To Make Good Citizens

Every Canadian Child Must Have Rights of School

Winnipeg.—The standard of this province has set is that the child of every Canadian citizen, no matter what his nationality or the country from which he has come, shall have the priceless privilege of getting a public school education, with the object of enabling that child to develop into a good Canadian citizen.

This was the statement of Premier T. C. Norris at the fourth annual convention of the Ukrainian citizens of Canada, which was held here.

Premier Norris said it would be fatal to the Canadian, and also to the Ukrainian, people to be divided regarding the importance of developing the highest kind of citizenship in Canada. It was the duty of the Manitoba government and all other governments in the Dominion to make it possible for every child in the country to become a Canadian citizen of the right type.

The Manitoba department of education recognized its duty in this connection.

Once in a while an actress makes good for her press agent.

London.—The imminence of the government bill concerning the drink trade produces a number of press comments here. The Daily News, which at once time refused liquor advertisements and declined to print the racing news, but has since modified this attitude, thinks the proposals either of the trade itself or of the prohibitionists will never command popular approval. It suggests that the 1915 report showing state purchase to be both practicable and desirable, should be taken from pigeon holes.

"What we want is a sufficient supply of wholesome liquor at reasonable hours for purchasing and suitable prices for consumption," declares the Express, which further indicates approval of reform on lines already carried out in the Carlisle district.

The Daily Mail says the new scheme clearly will contain some "fussyness" Johnson. The government will urge a compromise pleasing for the prohibitionists by imposing further restrictions, containing the trade by making public houses more comfortable and more remunerative than at present.

"What the country wants," adds the Mail, "is a better licensing system, giving better public house accommodation which a decent man can own creditably and decent people use without loss of self-respect."

Living in Fool's Paradise

Ex-Kaiser Wilhelm Does Not Expect to Be Extradited

Amsterdam.—The Telegraf, quoting an authoritative source, says both the Netherlands government and former Emperor Wilhelm of Germany are still confident that nothing will come of the report that there will be a demand for the extradition of the one-time emperor.

The newspaper adds that former Crown Prince Frederick William, who, it says, has less to fear from extradition than his father, takes the matter more seriously.

The Telegraf's authority says that the breach between the former emperor and his son, while it has not yet been healed, is less bitter, the son having yielded somewhat to his father because of the wishes of his mother.

Baltic Fighting Stopped

Hostilities Between Lithuanians and Germans at an End

Copenhagen.—The inter-allied Baltic commission has stopped hostilities between the Lithuanians and the Germans and Russians, and has directed the combatants to retire to the demarcation line of October 30, according to advices to the Lithuanian press bureau, from Kovno.

A man wastes more time during a six months' courtship than he does all the rest of his life waiting for street cars.

WATER PROJECT FOR SOUTHERN SASKATCHEWAN

Co-operation in the securing of natural gas and water is being tried by the two chief cities of Southern Saskatchewan, Regina and Moose Jaw. In connection with gas, Moose Jaw, Regina and also Swift Current have granted franchises to a syndicate headed by western and eastern capitalists, who propose to bore for gas and pipe it to these cities; erect distributing systems and sell gas to the consumers at a price agreed on in the franchise. All cities voted by substantial majorities to grant the franchise.

In connection with a water supply, Regina's source is artesian wells, while Moose Jaw derives its water through a pipe line from a small watershed. The supply in both cities is "unsatisfactory," particularly in Moose Jaw. Preliminary steps have therefore been taken towards the initiation of a comprehensive water scheme for the cities, towns and rural districts of southern Saskatchewan.

A meeting of the municipalities interested has been held, and was largely attended. The proposed scheme involves the tapping of the South Saskatchewan River and the lifting of the water a height of 90 feet to a reservoir, from where it would be led through a 36-inch pipe line for a distance of 65 miles, and thence through two branch pipe lines of 30 inches in diameter to the two cities of Moose Jaw and Regina. The work would take three years to carry out at an estimated cost of \$6,000,000. Under the scheme 7,000,000 gallons of water could be delivered by gravity to each of the two cities at a pressure of about 60 pounds or about three times the quantity which is now being consumed. It is stated that the cost to the consumer would be little or no more than rates now being paid for supply from local watersheds.

The South Saskatchewan River is owned by A. J. McPherson, consulting engineer to the government, to be ideal, having the proper degree of softness. The project calls for some assistance from the government, and Mr. McPherson indicated that representations to this end would be sympathetically received. For purposes of finance the creation of a municipal water area is suggested with power to issue bonds. The scheme would be administered by a water board, which would sell bulk to the various municipalities. The question involves the preservation of Saskatchewan rights in headwaters which arise in Alberta.

Submarine Hunting

Metal Fish Helped to Track the German U-Boats

In the December issue of Popular Mechanics Magazine is found an interesting sequel to the story of the two submarine-hunting sea lions, told in its July number. The venture was remarkable in itself, says the magazine, yet even more so is a mechanical application developed from the experiments. Sea lions were found to have their limitations; the "personal equation" was too prominent. So, hollow bodies, shaped like seals or porpoises, were made of very thin metal and equipped with hydrophones. The metal fish was filled with water and towed by a vessel of the submarine patrol. Inclosed in the towing cable were wires which led to sensitive telephone transmitters on board the vessel. Dragged at the end of a very long towing cable to eliminate local noises, the metal fish often gave warning of enemy submarines at surprising distances.

Lake of Soda in Africa

In British West Africa, at Magadi, there is a large lake which has the appearance of being perpetually frozen. It is an immense expanse of soda, millions of tons. To market this soda it is necessary to cut the surface of the lake exactly the same as ice is cut. In a few days the surface has again completely solidified, and another layer of soda is ready to be cut into blocks.

It is impossible to calculate the amount of soda that may be obtained, as the lake is fed by many small springs.

Son's Looks

Father. — Well, now that you've seen my son, which side of the house do you think he more closely resembles?

Genial Friend. — H—m—of course, his beauty is not yet developed; but surely you would not suggest that he looks like the side of the house? — Blighly (London).

It is estimated that the oil lost annually by the burning oil wells is equal to nearly 2,000,000 barrels.

The Future of the British Empire

No Reason to Fear No Matter How Great May Be Present Difficulties

Field Marshal Haig, in speaking the other day at Wolverhampton of a statement made by Ludendorff in his book, said: "One of the things that struck me in reading these memoirs was the mental distress and hopelessness of the outlook that overcame him when he realized that the instrument with which he worked, the German army, was broken to pieces in his hand. It is an experience that I never had to contemplate. I know the command, even though greatly outnumbered, even though their strength was tried to the utmost by the strain of great unequal battles, yet such as remained to me would each of them fight a man's battle and fight it more stubbornly the more desperate conditions grew. The splendid instrument that served me might ultimately be worn out, but so long as it existed at all it would go on working. It would never break in pieces in my hand."

With men such as composed the British armies in France, whether they hailed from the Old Land, Canada, Australia, South Africa, or any of the other overseas dominions and colonies, and with women of the type who "carried on" all over the empire while the manfolk did the fighting, what reason is there to fear for the empire's future no matter how great may be its present financial obligations, trade problems and social difficulties?

The Boston Transcript has the situation correctly sized up when it says:

"However great England's financial and economic problems, British statesmen will be able to look with hope to the future. Great Britain has emerged victorious from the greatest war in history. Her vast empire remains intact, and there has been added to it many of Germany's former colonies. The elimination of the threat of the German navy, and the menace of German colonial expansion will make possible great reductions in the next few years in the expenditure for national defence. The rising generation in Great Britain may well share in the greatest era in the history of the British Empire." — Regina Leader.

Joys of Flying

Not Much Spooning Is Done in Airplane, Says Mary Roberts Rinehart

The most fatal thing of all at the present time to the popularity of flying is its unsociability. The pilot may have the profile of a Greek god, but if every time he turns it to speak it is necessary to shut off the engine, and one's heart stops to it, it is difficult to think of a witty response. And mostly he does not turn it. All one has for company is the upper two-thirds of the back of a leather helmet. As a match-making proposition the airplane is a failure. And as for descending to some flowery meadow and there saying all the things he has been thinking up while in the air, I can only say personally that after two hours of flying I was stone deaf, and I wouldn't have known whether he was telling me he adored me or was asking me if I wanted a drink of water.

I was quite dead for some time. We landed at an army aviation field before a lot of ground mechanics and flyers, and if I expected that the removal of my goggles and discovery of my sex was going to make any sensation I was disappointed. They thought they ran up and shook me by the hand and observed that I was a brave woman.

They did not. A man in overall came up, and I gathered by his reading to think of a witty response. And mostly he does not turn it. All one has for company is the upper two-thirds of the back of a leather helmet. As a match-making proposition the airplane is a failure. And as for descending to some flowery meadow and there saying all the things he has been thinking up while in the air, I can only say personally that after two hours of flying I was stone deaf, and I wouldn't have known whether he was telling me he adored me or was asking me if I wanted a drink of water.

I was quite dead for some time. We landed at an army aviation field before a lot of ground mechanics and flyers, and if I expected that the removal of my goggles and discovery of my sex was going to make any sensation I was disappointed. They thought they ran up and shook me by the hand and observed that I was a brave woman.

Dealing With the Turk

Turkish promises are as gassy as a spider's web and as unsubstantial. The one thing the Ottoman understands is force. Whenever he is confronted by superior power he mends his ways, but he never has improved under other circumstances, and only an optimist will believe that he will show an improvement now unless coerced into good behavior. — Seattle Times.

Western Canada And Oil Fields

British Interests Now Control Most of the Great Oil Fields

The big effort now being made at enormous expense by the Imperial Oil Co. to discover large oil-producing fields in Western Canada may have resulted from recent estimates made by the United States Geological Survey that there is only enough oil in the ground of the great republic to last the country for a period of 29 years. Other and even, later reports place the period as low as 22 years.

Today the Imperial Oil Co. relies very largely upon the United States sources of supply, and if the exhaustion of that supply is already within measurable distance it is good business, apart from all other considerations, to endeavor to find a new supply in Canada. From a Canadian point of view the development of oil fields within the Dominion is in any event, and even if the United States supply was not in danger of becoming exhausted.

Reports appearing in leading financial and industrial papers of late indicate that British investors and commercial interests, with that vision which in the past placed the Old Land in first place among the financial, manufacturing and exporting nations of the world, have been quietly securing control of oil supplies in all parts of the world, and that in the comparatively near future Great Britain and not the United States will lead predominance in the oil world.

Today the United States provides 66 per cent. of the world's supply of petroleum, and it is said that never, since petroleum became an article of world demand, has the United States produced less than 60 per cent.

Now, according to the United States Geological Survey reports already referred to, a change is impending, and just as the United States was compelled to relinquish its position as the great lumber producer of the world, so it will lose its pre-eminence in the oil industry, and this at a time when oil has become one of the chief factors in transportation and as a motive power in all industry, and recent invention has enormously increased the demand for it. Experts declare that the day is not far distant when the United States, instead of being the world's greatest exporter of oil, will likely become the chief importer of that commodity.

When that time comes, it will be to British interests that the United States will have to turn. Last year the United States imported 38,000,000 barrels of oil, and it is predicted that, if the present rate of consumption is maintained, in ten years the United States will be importing 500,000,000 barrels annually. This enormous quantity will have to be bought very largely from British interests which now control most of the great oil fields throughout the world through two great corporations, backed to some extent at least, it is believed, by the British government.

The discovery of large oil fields in Canada would add enormously to the wealth of the Dominion, and would become an important factor in assisting to develop the other natural resources of this country, and materially increase the export trade of Canada which is so essential to the carrying and ultimate liquidation of our heavy burden of war debt. — Regina Leader.

Empire Must Keep A Strong Navy

That Can Face Future Foreign Menaces With Confidence

A larger navy for the British Empire, a navy that can face all future foreign menaces with confidence, and that would not leave Britain's overseas dominions in the same dangerous position that they held in 1914, was advocated by Admiral Viscount Jellicoe in a speech at a dinner given by the Canadian Club in Victoria.

"The lesson of the war," he said, "is that the navy should not be kept short of overseas squadrons. I believe the Empire as a whole will come to the conclusion that it is its duty as an Empire to see that the navy is up to such strength that the disadvantages it found itself in during the war will not occur again."

"Everyone knows that the Empire is hard up. But I don't believe that the Empire should consider itself so hard up that it cannot keep up an efficient navy. We all hope that the League of Nations will prevent, or at least minimize the chances of war. But when you consider what is at stake, the future life of the British Empire, you will agree with me that we should take no chances. There's no use doing great things unless we learn great lessons."

How Railways Are Swindled

Tricks and Deceptions Which Invariably Come to Light And Result in Arrests and Dismissals

Discussing the recent arrests of sleeping car conductors charged with accepting money from passengers for fares and not turning this money over to the companies, a well-known Western railway official made the following statement:

"Frequent arrests of sleeping car and train conductors by railway companies in which fraud—against the company is exposed always brings a certain amount of adverse criticism, the generally expressed opinion being that 'it is not fair to the employees to expose them to the temptation of detectives,' generally known as spotters, who are popularly supposed to board the trains and offer the conductor an amount smaller than the regular fare to be carried between certain points."

"Recently telegraphic despatches appeared in Milwaukee and Chicago papers to the effect that 'further arrests and disclosures were promised for today in an alleged \$75,000 swindle whereby the Chicago, North Shore and Milwaukee electric road was the victim.'"

"One of the men arrested is the manager of a film agency, another a film salesman and the third a conductor. The mode by which this swindle was conducted is an old one; the conductor simply neglected to punch the tickets collected by him and turned them over to a syndicate of his friends who in turn resold them to friends at reduced rates."

"Only a short time ago a conductor on a Canadian railway was dismissed from the service for a swindle of the same kind. It took no spotters nor experienced detectives to catch this man. A clerk in one of the departments of the company applied to his principal for a reduced rate to a point one hundred miles distant. As the clerk had been in the employ of the company only four months he was not entitled, under the rules, to a reduced rate and was told this by the head of the department. He (the clerk) remarked, 'Oh, yes, all right; I can get it through my aunt.' Naturally, the head of the department began to think. He wondered who was this aunt that she could break down the rules of the company and with apparent ease. He reported the circumstances to his superior officer who in turn made a report to the ticket auditing department. It was easily found out that the clerk boarded with his aunt as did also the train conductor on the run between those two points. The aunt was asked to come to the office of the auditor and at once confessed that she had been the broker between the conductor and friends of hers whom she could trust. It took no spotters nor detectives for that job."

"The fare between stations A and B is five dollars. A man who frequently traveled between those two stations one day said to the conductor: 'Why not make a split on this fare. I go over the road every week and you might as well have it as the company's.'"

"Half fare was agreed on and the traveler paid the conductor two-fifty. This went for two weeks and one day the man said, 'I don't intend to pay you two-fifty any more. Here is one-fifty.' The conductor demurred, but the man told him he could either take that or nothing. He took it. That price was paid for two trips then one dollar, then fifty cents and then the crowning of it all came when a cigar was tendered. The conductor said, 'This has gone too far now. You can pay full fare or get off!'

"'Get off, will it? You put me off and see what will happen to you,' said the man. The man rode for nothing. Not only that, he would send his card to this conductor with 'Jim, this man is all right.' Finally Jim got to the breaking point, went to the auditor and confessed, and asked to have the man prosecuted for offering bribes."

"A short time ago a hotel in Montreal was raided under a warrant on suspicion of being the headquarters of illegal ticket selling. Officers found a list of names and amounts paid to the hotel."

"Troublesome Times Ahead
One trembles to think of what is going to happen at Ottawa when the Farmer M.P.'s find themselves paying 23 cents apiece at the Chateau for the potatoes which they sold for \$12.5 a bushel. — Winnipeg Free Press.

If there were but one potato in the world a careful cultivator might produce as many as 10,000,000 from it in ten years.

PRINCE OF WALES ON UNITY IN CANADA

A speech that aroused much enthusiasm when it was delivered, and which was the subject of a great deal of favorable comment afterward, was made by the Prince of Wales at a luncheon given in his honor at the Place Viger Hotel by the city of Montreal. Referring to the mutual understanding between the English-speaking and French-speaking sections of the Canadian nation, the Prince said that the union of the two races in Canada was never a matter of mere political convenience. "On the contrary," he said, "it was, and will always remain, an example of the highest political wisdom, for which the Empire owes an incalculable debt to Carleton, Macdonald and the other statesmen of both races who brought it about."

"Much has been written and said about the success of the British Empire in establishing political union between peoples of different race, language and history. But when you come to think of it, the political unions established in Canada and South Africa were only later examples of the political union which brought England and Scotland which brought Great Britain itself into existence as a political unit only two centuries ago. Till that time England and Scotland had been constantly and bitterly at war, since that time they have grown so close that we have all forgotten that they were ever separate peoples."

"The union of England and Scotland has been in existence for two centuries; the union of British and French Canada has been in existence for little more than half a century—but who can doubt that the union in Canada will produce as great, as powerful, and as united a nation as the British nation itself? The genius of both races is closely interwoven throughout the great Dominion, not only in the East, but in the West, where both races share the honors of the early explorers and pioneers."

Without it the British Commonwealth Would Dissolve
Perhaps the most valuable function of the British crown in these latter times is its function as the chief bond of empire. Without it the British Commonwealth or Empire would dissolve. If Britain were to become a republic, the Dominions would fall away and erect themselves into independent republics, and India would probably become the scene of terrible internal strife, with the prospect of being seized and exploited by some predatory power.

Only a few days ago Mr. Thomas, secretary of the British Railway Workers' Union, declared that he was a strong supporter of the monarchy because he was convinced that it is necessary to the welfare of the British people and the empire. Doubtless that opinion is general among the workers of Britain, and loyalty to the crown will prove a bulwark against the flood of revolutionary sentiment which is fostered by the unsettled industrial conditions. In Canada, loyalty to the crown is reasonable, because it is based upon recognition of the fact that the crown is the keystone of the arch of our governmental system—a system under which we have prospered and expanded, and which suits us.

Tallest Britisher
Compared with Patrick O'Connor, Albert Brough, who died a short time ago, and who, owing to his 7 ft. 6 in., was regarded to be the tallest man in the world, was a midget.

O'Connor, who is at present in South Africa, is stated to be the biggest man on earth. Certainly, he is the tallest British subject.

A veritable modern Hercules, O'Connor is almost 8 ft. high, and a person 6 ft. 6 in. high can walk beneath his arms when outstretched horizontally. He has a chest measurement of 55 in. and weighs 357 lbs., while the ring which adorns the index finger of the giant's right hand is so large that a florin can pass easily through it.—London Tit-Bits.

How to Live Forever
Eat nothing but stewed parsnips. Drink nothing but cold water. Go to bed at 8 o'clock every night. Get up at 6 every morning. Don't smoke, chew or play poker. Go to church every Sunday morning.

Split three cords of wood every day. Walk 18 miles before breakfast. Ride horseback for two hours every day.

Don't kiss the cook or anybody else. Shun the public drinking cups. Keep out of crowded cars. Now comes the most important instruction, if you would live forever: Don't die.

—New York Evening Mail

Of Interest to Women
Activities of the Fair Sex the World Over
Turkish women eat rose leaves with butter to secure plumpness. In London, ladies' maids who are also qualified to run m'lady's automobile are paid an extra high wage. In Chile, it is customary, whenever a stranger is received in the house, for each of the ladies of the family to offer him a rose.

Prof. Carrie Derick, professor of botany in McGill University, has the distinction of being the only woman in Canada with the title of professor.

It is a fact not generally known that Queen Elizabeth of the Belgians is the namesake and goddaughter of the married Empress Elizabeth of Austria.

In Sweden, young girls place under three cups a ring, a coin and a piece of black ribbon. If the ring is first accidentally exposed she will be married within a year; if the money, she will get a rich husband; if the ribbon, she will die an old maid.

In Korea the women are taught to shun the opposite sex from their earliest girlhood. Their seclusion is carried to the utmost limit. Out of doors the women usually wear a green mantle which covers the whole countenance except the eyes. Nor do they willingly let even their eyes be seen.

In China, a girl who is partaking of the last meal she will eat in her father's house, previous to her marriage, sits at the table with her parents and brothers; but she must eat no more than half the bowl of rice set before her, else her departure will be followed by a continual scarcity in the domicile she is leaving.

What the Prince Typifies
The Prince of Wales in his person represents an institution which means so much for the stability of the empire of which we form a part. Some day in the ordinary course of nature he will be the official head of that empire, and in his name our laws shall be made and administered.

In offering the Prince the evidence of our devotion and loyalty, therefore, we are merely expressing our respect and confidence in our own institutions. There is nothing in the British monarchy as it is today to interfere with the fullest development of self democracy. As a matter of fact, the British monarchy is one of the most genuine and democratic institutions in the world.

It is a remarkable fact that the deepest parts of the sea are in all cases very near land.

The insomnia of the midnight cat is contagious.

BILIOUSNESS

How to Prevent and Cure

Among the earliest symptoms are furred tongue and dull headache. Then come dizzy spells, bad taste, quick pulse, fever and cold sweats. Finally, sleeplessness and vomiting make the condition of the sufferer almost intolerable.

The root of biliousness is with the liver which is clogged and can't keep bile from getting into the blood.

Nothing works with the certainty of Dr. Hamilton's Pills; they act directly on the liver, restore the bile to its proper course and prevent it from contaminating the vital fluid.

Of course, the bowels are ordered and relaxed by Dr. Hamilton's Pills, the kidneys receive new tonic, the blood is renovated and the result is a renewal of good health.

No need for delay, the sooner you use Dr. Hamilton's Pills, the sooner you'll feel the brisk, keen satisfaction of a healthy, well-regulated system. Sold in yellow boxes, 25c.

The two men laughed over the story, and yet it left an unpleasant impression upon Dave. He had never felt sure of Conway, and now he felt less sure than ever. But the last of easy money was beginning to stir within him. The bill in his hands represented more than three weeks' wages. Conway was making money—making money fast, and surely here was an opportunity such as comes once in a lifetime. A boy shoved in his head and yelled for copy.

Dave swore at him, impatiently. He had sworn before realized how irksome the drudgery of his steady grind had become.

"I'll go you," he said to Conway at last. "I'll risk this hundred, and a little more if necessary."

"Good," said Conway, springing to his feet and taking Dave's hand in a warm grasp. "Now we're away. But you better play safe. Stick to your pay cheque here until we pull the deal through. There won't be much to do until then, anyway, and you can help more by guiding the paper along right lines."

"It sounds like a fairy tale," Dave demurred, at though unwilling to credit the possibility of such a thing had outlined. "You're sure it can be done?"

"Done? Why, sure, it has been done in all the big centres in the States, and at many a place that'll never be a centre at all. And it will be done here. Dave, bigger things than this dare to dream of are looming up right ahead."

Then Dave had a qualm. "If that section of land is worth close to a million dollars," he said, "it's quite fair to take advantage of the owner's absence and ignorance to buy it for a few thousand?"

"Dave," said Conway, with an arm on his shoulder, "the respectability of the firm is safe in your hands. But—please let me weigh the coin."

CHAPTER ELEVEN

David Elden smiled at his after-dinner cigar in his bachelor quarters. The years had been good to the firm of Conway & Elden; good far beyond the wildest of their first dreams. The transaction of the section brought from the English absentee had been but the beginning of bigger and more daring adventures. That section was now considered close-in property, and lots which Conway & Elden had originally sold for two hundred dollars each had since changed hands at more than a thousand. The street railway ran far beyond it. Water mains, sewers, electric lights, graded streets and concrete sidewalks had sprouted for miles across the prairie. Conway, it is that first wild prophecy of his, had spoken of a city of a quarter of a million people; already more lots had been sold than could be occupied by four times that population.

It had been a very marvellous development, an enthusiasm which had grown deeper and wider until it swept along as an insane abandon, bearing in its current the last vestiges of conservatism and caution. For at last the old-timers, long allied to the "dead ones," had come in. For years they had held back scoffing, predicting disaster; and while they held back venturesome youths had become millionaires. One can stand that only so long, and at last the old-timers were buying and selling and dabbling with the others in the lust of easy money.

Dave had often asked himself where it all would end. He traced it from its beginning, from the day when he wrote his first "boost" story; from the hundred-dollar bill that Conway had placed in his hands. It was a simple course to trace; so simple now that he was amazed that only Conway and a few few others had seen it at that time. It had begun with the prosperity of incoming money; the money of a little group of speculators and adventurers and the others who hung on their train. They had filled the few hotels and office buildings. Presently someone began to build a new hotel. Labor was scarce and dear; carpenters, masons, bricklayers, plumbers, plasterers, painters, had to be brought in from the outside. There was no place for them to sleep; there was no place for them to eat; there were insufficient stores to supply their wants. More hotels and shops and stores and houses had to be built, and to build them more carpenters and masons and bricklayers and plumbers and plasterers and painters had to be brought in from the outside. The thing grew upon itself. It was like a fire starting slowly in the still prairie grass, which by its own heat creates a breeze that in turn carries the flame to a gale that whips it forth in uncontrollable fury. Houses went up, blocks of them, streets of them, miles of them, but they could not keep pace with the demand, for every builder of a house must have a room to sleep in, and there were streets to build; streets to grade and fill and pave; ditches to dig and sidewalks to lay and wires to run. More houses had to be built for the men who paved streets and dug ditches and laid sidewalks and strung wires. And more stores and more hotels and more churches and more schools and more places of amusement were needed. And the fire fed on its own fury and spread to lengths undreamed by those who first set the match to the dry grass.

The process of speculation was as easily defined. The first buyers were cautious; they looked over the vacant lots carefully, weighing their advantages and disadvantages. The prospect of the city growing this way or that. But scarcely had they bought when they sought again at a profit, and were seized with the same desire that they had not bought more, or earlier. Soon the caution of the early transactions was forgotten, and more lots which, almost immediately, could be resold at a profit. Judgment and discretion became handicaps in the race. And there were streets to build; streets to grade and fill and pave; ditches to dig and sidewalks to lay and wires to run. More houses had to be built for the men who paved streets and dug ditches and laid sidewalks and strung wires. And more stores and more hotels and more churches and more schools and more places of amusement were needed. And the fire fed on its own fury and spread to lengths undreamed by those who first set the match to the dry grass.

And more stores and more hotels and more churches and more schools and more places of amusement were needed. And the fire fed on its own fury and spread to lengths undreamed by those who first set the match to the dry grass.

And the firm of Conway & Elden had not met the last time in the wild years of gain-getting. Their mahogany finished first floor quarters were now a maze of offices and law offices. Conway's private room might with credit have housed a premier or a president. Its purpose was to be impressive, rather than to give him other service, as Conway spent little of his time there. On Dave felt the responsibility of the firm, and his room was fitted for efficiency rather than luxury. It commanded a view of the long general office, where a battery of clerks and clerks took care of the detail of the business of Conway & Elden. And Dave had a private secretary, an office manager. His fairness, his fearlessness, his impartiality, his fearlessness, his even temper—save on rare and exceptional occasions—had won from the staff a loyalty which Conway, with all his abilities as a good mixer, could never have commanded.

He had prospered, of course. His statement to his banker ran into seven figures. For years he had not known the experience of being short of money for any personal purpose. One day, however, when he was finishing the firm had found it necessary to resort to high finance. This was usually accomplished by getting a bank so deeply in their hands in their speculations that, in moments of emergency, it dared not desert them if it would. There were no more of doing that. And always the daring of Conway and the organization of Elden had justified themselves. Dave was still a young man, not yet in his thirties; he was rated a millionaire; he had health, comeliness, and personality. He was a man of the respect of a wide circle of business men, and was regarded as one of the matrimonial prizes of the city; his name had been discussed for public office; he was a success.

And yet this night, as he sat in his comfortable room and watched the street lights come fluttering on as twilight silhouetted the great hills to the west, he was not so sure of his success. He was a man of the respect of a wide circle of business men, and was regarded as one of the matrimonial prizes of the city; his name had been discussed for public office; he was a success.

He suspected the man vaguely, but had never found tangible ground for his suspicion. Dave did not know the two coincidences in peculiar to a state of semi-intoxication were denied him. He was afraid to drink, not with the fear of the craving, but with the fear of a man who knows his enemy's advantage. He had suffered in his own home, and he feared the enemy, and would make no trace. Neither was he seduced by the vices which the possession of wealth made easy to his hand. He counted more as a dream—a sort of supernatural out of the past—that last night and that last compact with Irene Hardy, but it had been anchorage for his soul on more than one dangerous sea, and he would not give it up. Some time, he supposed, he would have a wife, but until then that covenant, sealed by the moonlight to the approving murmur of the spruce trees, should stand as his one title of character in a world which no caveat might be registered.

(To Be Continued.)

Experiences of
Successful SettlersPrize Offered for the Best Story on
Farm Life

In order that the Department of Immigration and Colonization may have at its command authentic accounts of the experiences of successful settlers in various parts of Canada, it has decided to offer cash prizes for letters or articles not exceeding two thousand words, written by settlers in each of the nine Canadian provinces. The articles will be judged by a committee to be appointed by Hon. J. A. Calder, Minister of Immigration and Colonization, and should be mailed not later than February 14, 1920, to the director of publicity for the department. Three cash prizes will be given, one of \$75, one of \$50, and one of \$25, in each of the nine provinces.

It is explained that the competition is not a literary contest, the official announcement stating that literary style, correct spelling, etc., will not be considered essential. Tell your story in your own words.

The Prince's Ranch

Is One of the Oldest in the Country
and Consists of 1,600 Acres

Further information regarding the purchase of the above described ranch, west of High River, by the Prince of Wales, is announced. The ranch is one of the oldest in the country, having been taken up first in 1863 as a homestead. It consists of 1,600 acres of freehold and leases. Mr. George Lane, proprietor of the "Bar U," in making an official statement with regard to the purchase, said that most of the present stock on the ranch will be disposed of. A member of Mr. Lane's staff, now on his way to England with a shipment of Percheron horses, will help to select some suitable animals which will consist of purebred Shorthorn cattle, purebred Shropshire sheep, and a few thoroughbred horses from E.R.H.'s farm in England to stock the new ranch. Ex-service men, both imperial and Canadian, will be employed on the ranch.

Quits

A suspicious looking customer was heading to a grocer of the cheapness of ten pounds of sugar he had bought at a rival shop.

"Let me weigh the package," said the grocer.

The other assented, and it was found two pounds short.

The man looked perplexed for the moment, and then said: "I don't think he cheated much, for while he was getting the sugar I pocketed two tins of condensed milk."

A purchaser of an old Arab musket in an antique shop in Paris discovered in the barrel of the weapon two hundred and forty valuable turquoises, all of beautiful color.

It doesn't take much of a philosopher to draw moral deductions from the misfortunes of others.

Butter and axle grease look alike to a man in love.

London Forced
To Expand Upward

Question of Skyscrapers Is Being
Revived Because of the High
Price of Property

The old question of whether London is to have skyscrapers is being revived because of the high price of property in the business section and the lack of space in office buildings. The government buildings in Whitehall are four stories high, but it has been found necessary to add a story to the War Office to meet the demands of the department. One well-known architect in touch with the government's plans expressed the opinion that unless the new and old ministries were content to do their work outside the area devoted to governmental activities skyscrapers were inevitable in Whitehall. Generally speaking, however, London does not like tall buildings. Percy Tibbs, past president of the Society of Architects, declared that if the skyscraper was to come it would be necessary to widen the streets. "But space in London is not so scarce as it is in New York, which is an island," he said. American architects who are in London erecting a huge department store have repeatedly asked for permission to extend the main building high enough to accommodate not only the present business of the store, but to provide for the future, and have met with no encouragement whatever.

Developing the Air Route

Scientist Predicts That Ocean Will
Be Crossed in Three
Hours

Tesla, the great electrician, who discovered the alternating current by which we can penetrate great distances, thinks it is coming when we may fly eight miles above the earth at a speed of 1,000 miles an hour. This is no guess with the inventor, it is the result of close calculation in higher mathematics. He believes it will then be possible for a business man in New York City to step into a hermetically sealed steel fuselage at 3.30 p.m. and reach his hotel in London three hours later in time for dinner.

To be able speedily to cross the ocean an altitude plane will be needed that can rise above the storm limit and not become weather bound as were the aviators who recently flew across.

Samuel Mott, of the Aero Club of America, believes it will be possible to fly as high above the earth as 15 or 20 miles in a craft specially designed for high flying. This will require a machine that will work in such highly rarified air and provide a certain amount of oxygen for navigators and passengers, likewise warmth in temperature much below zero. It has been discovered that for every 100 feet of ascent the air pressure is diminished one half pound per square inch. Air navigation at high altitudes undoubtedly would result in high increase of speed.

Passengers and pilot would have to be entirely enclosed just as an ocean diver is enclosed. The human body is adjusted to an air pressure of 15 pounds to the square inch. If that pressure were reduced about three pounds, as it would be at a height of eight miles, the aviator's ear drums would burst and blood would flow through the pores and ooze out of the body. The effect would be like that of bringing a deep sea fish, accustomed to living a mile below the surface, to the surface of the water. The fish simply explodes for lack of the pressure which its body is built to withstand.

Tesla believes the air craft of the future will have its power transmitted to it through the air by wireless transmission. Distance, says Tesla, is absolutely of no consequence. The airplane would receive the same power whether it was 12,000 miles away or immediately above the plant. And here is a thought of Tesla's in regard to the next war if there be one: "In the future nations will fight each other by thousands of miles apart and no soldier will see his enemy. In fact future war will not be conducted by men directly but by the forces which if let loose may well destroy civilization completely." If war comes again Tesla looks for the extensive use of self-propelled vehicles carrying enormous charges of explosives which will be sent from any point to another to do their destructive work and no human being aboard to guide them.

The Farmers' Chance

The farmers have at last learned the benefits of being united. But, if they want to win some real results from the whole province, just let them unite against the high cost of living. They know how to legislate it out, and the people are hoping for great things.—Gulph Mercury.

Praise From U. S.
Bureau of Education

Saskatchewan Schools Commended
for Their Progressive
Methods

High praise is being to Saskatchewan schools in a bulletin on "Education in Parts of the British Empire," which has just been issued by the Bureau of Education, Department of the Interior, Washington, D.C. After commenting on the progress in education made in recent years in Manitoba, the report states:

"The democratic idea of Manitoba are even more pronounced in the province just to the west, Saskatchewan, but centralization more akin to that of the eastern provinces has asserted itself in the public school system of the latter. This centralization, however, has not lessened the deep, popular interest in the schools. Perhaps the most convincing proof of this was the educational survey of the province decreed by order-in-council and undertaken during the latter half of the year 1917.

"The public has been favorably prepared for this survey by the activities of the Public Education League, which had launched public meetings and led up to the proclamation of a public holiday by the premier, on which the needs of educational reform were emphasized at rallies held at a number of points. All this time there has been no lapse in public interest in education, as is shown by the fact that, since the organization of provincial government for Saskatchewan in 1905, school districts had been organized at the extraordinary rate of one a day.

"With the tremendous increase in the amount of routine work thus developing upon the department of education, serious discussion arose as to whether the school unit with a board of three trustees was not too small, and whether the organization of boards of seven members, as for the municipalities, would not be better able to handle a much larger territory organized as a municipality. The matter is as yet unsettled, but indications are that an organic change will be brought about by the stirring of public interest.

"The progressive nature of the people and of the schools of Saskatchewan was well brought out in the findings of the survey to which reference has been made. The strongly centralized system, it was agreed, had been of very great service in the early primitive days, but the findings bore out the belief that a system more adapted to a largely increased population, and especially one giving consideration to local needs, was now required.

The School Attendance Act, which came into effect May 1, 1917, at once increased the enrollment and regularity of attendance of school children within the compulsory ages of six to 14 years. By its provisions town and district appointment officers, who report to the department of education every month. In village and rural districts such duties are fulfilled by the teachers. As regards territories covered by the School Act, and length of school year, every town and village district, and every rural district with at least 12 children of compulsory age resident within 1½ miles from the school house, shall offer at least 210 teaching days; and every district with at least 10 children of compulsory age shall offer at least 190 days. A most important phase of the act is that it provides for keeping systematic records of the population

STOPPED
CATARRH
SUFFERING
OVER NIGHT

I Gladly Tell How—FREE
HEALS DAY AND NIGHT

It is something new. It is something different. No lotions, sprays or sticky smelling salves or ointments. No application of any kind. Nothing to rub or massage. No electricity or vibration or heat. No powder, no plaster, no medicine in the throat. Nothing of that kind at all. It is something new and different—something different—something instantly successful. You do not have to wait and linger, and pay out a lot of money. You can stop it over-night—and I will gladly tell you how. It is not a doctor's prescription—but is freed of my suffering, I freed my friends. Your suffering will stop at once like magic. Write me promptly.

SEND NO MONEY
BE FREE FROM CATARRH!

Catarrh is filthy and loathsome—it dulls one's mind. It undermines your health and weakens your will. The howling, coughing, spitting is disgusting at all times. It is not a doctor's prescription—but is freed of my suffering, I freed my friends. Your suffering will stop at once like magic. Write me promptly.

Just write me today before you do anything else. Just say: "I want to try Jan-O-San." I will write to you with complete instructions. Your doctor is in a bad way. Write me today. You have asked for this wonderful treatment—but I have not time to waste. Write me today. **JAN-O-SAN**
59 St. Peter St., Dept. 155 Montreal, Que.

of compulsory age, which has hitherto not been legally required."

Agricultural Position
Of Canada

Means By Which Our National Debt
Will Be Reduced

The Hon. S. F. Tolmie, Canada's new Minister of Agriculture, has summed up the outstanding facts of Canada's agricultural position in an article appearing in the November number of the Agricultural Gazette. He presents statistics showing the growth of Canada's financial burden during the past five years, and points out means by which our national debt will be reduced. He says in part:

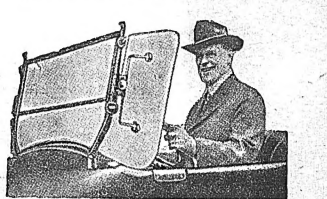

"I am confident that this Dominion, through the development of her natural resources, will in time wipe out her debt. Forests, fisheries and mines all contribute their part of the revenue, but by far the greatest returns will be derived from agriculture, which industry we must continue in permanency and increase in magnitude. . . . One of the greatest responsibilities that falls on either the federal or provincial departments of agriculture is the conservation of the great wealth that lies in the virgin soil. Innumerable considerations were involved in this one problem, but the whole affair can be accomplished if we engage in mixed farming with livestock as a basis. This is the fundamental principle underlying success in agriculture."

In the Bahama Islands which were settled more than two hundred years ago by Londoners, the Cockney dialect is said to be as strong as it is in Chesapeake.

It's an easy matter to furnish entertainment for your neighbors; all you have to do is to make a fool of yourself.

In China are to be seen horses that are spotted almost like leopards.

You Cannot Motor In Comfort Without Them

ROYAL SIMPLEX WINDSHIELD WINGS

THEY KEEP YOU SAFE IN ALL DIRECTIONS
THEY KEEP OUT DUST, WIND, RAIN, SLEET AND SNOW
Will also adjust to throw the air directly upon the occupants of the front seats and tonneau at will. The Royal Simplex Wings are handomely designed, and add a note of distinction to the finest automobile in the market. They are made of the finest material, and can be changed on any make of car in five minutes. The sale of the Royal Simplex Wings has been enormous since they were first put on the market in the United States.

Ladies need no Protection to their faces when riding in the front seat when the car is fitted with these WINGS
ROYAL SIMPLEX WINDSHIELD WINGS eliminate the draught for those in the front seat. In rainy weather it is not necessary to use side curtains for the front seat, thereby allowing the driver the same view of the road as in clear weather.

RETAIL PRICE \$25.00 Per Pair. NET
In Nickel or Black Enamel

Farm Superstitions Are Valuable

Helpful Information Discovered By
 Keenly Observant Persons

The problem of making agricultural superstitions into scientific data is being studied by experts of the U.S. Department of Agriculture, who declare that many old maxims handed down from father to son for generations are not really superstitions at all, but helpful information discovered by keenly observant persons.

They declare that there is a best time for every farm and garden operation and that some tree or shrub or plant indicates that time more accurately than all the scientific instruments can register it. It is those signs which were noted by the pioneers who laid the foundations of this country and recorded the results of their sayings handed down to posterity. Soon they will be dignified with the scientific name of phenomena, which is the science of phenology.

POOR, THIN BLOOD BRINGS INDIGESTION

Make the Blood Rich and Red By
 Using Dr. Williams' Pink Pills

This bloodless people generally have stomach trouble. They seldom recognize the fact that thin blood is the cause of indigestion, but it is. Thin blood, weak, watery blood, is one of the most common causes of stomach trouble. The glands that furnish the digestive fluids are diminished in their activity, the stomach muscles are weakened, and there is a loss of nerve force. In this state the stomach will more quickly restore appetite, digestion and a normal nutrition than good, rich, red blood.

Dr. Williams' Pink Pills act directly on the blood, making it rich and red, and this enriched blood strengthens weak nerves, stimulates tired muscles, and awakens to normal activity the glands that supply the digestive fluids. The first sign of returning health is an improved appetite, and soon the effect of these blood improving pills is felt throughout the whole system. You find that what you eat does not distress you, and that you are daily growing stronger and more vigorous. Mr. J. J. Murray, Regent street, Toronto, bears testimony to the value of Dr. Williams' Pink Pills in cases of this kind. He says: "During the last part of 1918 I was a sick man. My stomach seemed simply down, and I had no desire for food, and when I ate it I felt it in my stomach, did not sleep well, naturally got up in the morning feeling grouchy, my wife was worried over me. I had heard of Dr. Williams' Pink Pills, and I decided to try them. I have got my appetite back, sleep soundly at night, enjoy my meals and am so gratified with what the pills have done for me that I strongly advise their use for all pale, sick people."

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail at 50 cents a box, or six boxes for \$2.50 from the Dr. Williams' Medicine Co., Brockville, Ont.

Perfects Baby Airplane

A 130-pound airplane is France's latest contribution to aerial progress. A French engineer named Archer has taken out patent for the baby machine, which is electrically propelled with a maximum speed of 155 miles an hour and capable of carrying two passengers. Archer expects the machine to revolutionize communication between cities. Archer is inventor of the French army's "baby cannon."

Raising Princess Sophia
 The raising of the wreck of the Princess Sophia, which sank in Alaska waters 13 months ago with heavy loss of life, will not be attempted before next spring, it is stated by J. S. Byron, who has just returned from Juneau. The equipment that has been collected for the big job will lie in shelter at Bridge's Cove, three miles from Vanderbilt. Not until next May, when it is planned to proceed with the work. Bad weather and intense cold made it impossible to proceed this year.

Europe Facing Darkest Winter

Problem Too Vast for Private Enterprise or Generosity

A "city of mendicants" with meat ration of three ounces a week, and this unavailable; with milk for babies only; with eggs, beans, sugar, coffee, shoes and clothing exhausted; with hospitals closing one after another, so that the death rate must rise even higher; with 75 per cent. of the families living in one or two rooms—such is the picture. Baumgarten, Reumann, of Vienna, paints of that once gay capital.

It is impossible for Americans to realize the literal truth of such a statement; harder still to grasp that this is but a sample of conditions in almost every capital or industrial city in the vast war zone. Vienna is little worse off than Budapest or Warsaw; it is probably better off than Petrograd. Wherever large populations have been in the past dependent upon industries that are ruined, or upon transportation that has broken down, the tale of sorrow and suffering can be told in Herr Reumann's very words.

Ludendorff's recital has given some hint of how pitilessly territory in Poland and elsewhere was ravaged by retreating armies, for reasons of "military necessity." No foe marched through Vienna or into Petrograd. The stripping of industry and transportation by and for war was enough to wreak ruin which calls for universal pity.

Help there must be if more human beings are not to perish from cold and hunger than the war has slain. The problem is too vast for private enterprise or generosity. It requires, while senate debate drones on, the concerted action of the governments of the world if Europe is not to endure the darkest winter in all its history.—From the New York World.

Exhausted from Asthma.—Many who read these words know the terrible drain upon health and strength which comes in the train of asthmatic troubles. Many do not realize, however, that there is one true remedy which will surely stop this drain. Dr. J. Dr. Kellogg's Asthma Remedy is a wonderful elixir, to this enervating ailment. It has a countless record of relief to its credit. It is sold almost everywhere.

The World's Shipbuilders

A recent Lloyd's report, showing that Great Britain is building practically one-half the enormous tonnage under construction in the world's shipyards does not look as if the war had deprived the Mother Country of its place as the world's shipbuilder. War gave a tremendous impetus to shipbuilding in many countries, particularly in the United States and Japan, but without substantial government backing these countries seem unlikely to be formidable competitors of the British builders.

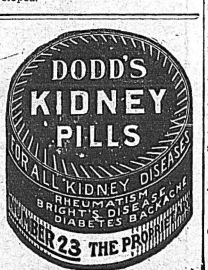

Miller's Worm Powders will eradicate the worm evil that bears so heavily on children and is believed to cause many fatalities. They are an acceptable medicine to children and can be fully relied upon to clear the food channels of the roughness of these destructive parasites and restore the inflamed and painful surfaces to healthfulness. They are an excellent remedy for these evils.

Horse Meat For Europe

Horses from Southern Alberta to Be
 Canned for Shipment to Europe

A trial shipment of horse meat is being made from Alberta to Europe. An announcement to this effect was made by H. B. Arkell, Livestock Commissioner of the Dominion Government, at the recent meeting of the Western Livestock Association at Victoria, British Columbia.

A few selected horses from Southern Alberta farms are to be killed and their meat boned and canned for shipment to Europe by a private meat-packing concern, according to Mr. Arkell. It is to be merely by way of experiment, and upon the results both here and at the other end will depend whether or not a permanent trade between Alberta and the horse-cannery markets of the old world will be developed.

International Hay And Grain Show

Saskatchewan farmers are preparing to send representatives to the exhibit of the International Hay and Grain Show, Chicago, this month. They hope to repeat the September successes at the International Soil Fertility Exposition, when they won first prize sweepstakes for wheat and oats, and several other prizes for grains, grasses and vegetables.

HEART SO BAD WAS NOT SAFE TO LEAVE HER ALONE

Miss Eva P. Yatem, Krugersdorf, Ont., writes:—"I feel that I must write and tell you of the benefit I have received from Milburn's Heart and Nerve Pills. About four years ago I was taken terribly 'had' with my heart, nerves and fainting spells, and was down in bed for about six months. I doctored with two different doctors and seemed to get better, although the fainting spells would not leave me. I would take such terrible falls, whenever I was, that it was not safe to leave me at home at any time. At last I decided to resort to proprietary medicines and took several different kinds, but seemed to receive but little benefit from them. One day noticing the advertisement of Milburn's Heart and Nerve Pills I decided to try them, and before I had taken more than two boxes I could see they were helping me. I have taken about six boxes, and am almost cured of those terrible spells. I sincerely feel that your medicine has proved a blessing to me, and I advise any one troubled with their heart to try them, as I am confident they will find relief."

Milburn's Heart and Nerve Pills are 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Canadian Watch-Making School
 The first watch-making school in Canada has been established in Montreal, to teach the trade to returned soldiers. Each man who becomes proficient is assured of immediate employment, as there is a great scarcity of watchmakers in the Dominion at the present time.

Minard's Liniment Cures Garget in Cows.

Almost every man has the mistaken idea that he is essential to the workings of the universe.

DOUBLE BEAUTY OF YOUR HAIR

"Danderine" creates mass
 of thick, gleamy waves

In a few moments you can transform your plain, dull, flat hair. You can have it abundant, soft, glossy and beautiful. Just use a drop or two of Danderine on your hair, and it will be a mass of soft, lustrous and so easy to do up. All dust, dirt and excessive oil is removed. Let Danderine put more life, color, vigor, and brightness in your hair. This stimulating tonic will freshen your scalp, check dandruff about falling hair and help your hair to grow long, thick, strong and beautiful.

To Deal With the Kaiser

Trial of Former Emperor Will Be
 Opened in London Early in the New Year

The British Government expects the trial of former Emperor William of Germany to begin in London early in the new year, and is completing necessary arrangements, says the Mail, which adds that as soon as the allies have ratified the peace treaty a united request for the surrender of the erstwhile emperor will be presented to Holland.

"There is no room for doubt that the request will be complied with," the newspaper adds. Ratification of the treaty is confidently expected in a few weeks.

Reindeer Company For Far North

Granted 78,850 Square Miles to Graze Caribou and Reindeer
 The North American Reindeer Company, capitalized at \$750,000, has been granted a concession of 78,850 square miles of land north of the Churchill River to graze caribou and reindeer upon. This amounts to 48,000,000 acres, for which the government charges four cents an acre per annum, according to the statement of officials of the company, which works out at \$192,000 a year for the total. It is stated that the company will proceed with their project in the spring, and the first move will be to gather the caribou herds. The Pas will be the headquarters of the enterprise.

It is a strange fact that Africans never sneeze; neither do their descendants, if they are pure-blooded, although domiciled in other parts of the world.

"SYRUP OF FIGS" CHILD'S LAXATIVE

Look at tongue! Remove poison from little stomach, liver and bowels

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruit taste. Full directions for child's dose on each bottle. Give it without fear. Mother! You must say "California."

Greenland, it seems, is a place of flowers, as well as of ice, report Gas Logie. Botanists have counted 120 specimens of flowering plants, growing in the land of the Smith Sound Eskimos, on its northwest coast.

The phrase, "living on tick," dates back to the seventeenth century, when a tradesman's bill was known as a ticket.

HOW TO "BE FIT" AT SIXTY

BY DR. LEE HERBERT SMITH.

As our boys "came marching home," they brought a certain red-blooded doctrine, and showed us the glory of a perfect body. They will show us how to "keep fit," even if we have passed middle life and are beyond the athletic stage. For the tired business man, the man who feels the daily grind and the nightly fag, has meager appetite, headaches, nerves unstrung, is gloomy, ending in a soggy brain, try the right way. Get out of bed, open the window, breathe deeply, exercise the army "setting-up," exercise or use dumb bells, until in a warm glow.

Before breakfast take hot water, and occasionally castor oil or a pleasant laxative made up of May-apple, aloin, jalap, and sold by all druggists as Dr. Pierce's Pleasant Pellets.

As Prof. Strauss says, "The excretion of uric acid we are able to effect by exciting diuresis." Drink copiously of soft rain or distilled water, six or eight glasses per day, hot water before meals, and obtain Anurio Tablets, double strength, for 50 cts., at the nearest drug store and take them three times a day. If you want a trial package send 10 cents to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y.

"Anurio" (anti-uric-acid) is the recent discovery of Dr. Pierce and is much more potent than lithia, for it will dissolve uric acid as hot tea dissolves sugar.

Lakes Will be Rivers

37,000 Years Hence, Lake Erie Will Be Pouring Into St. Lawrence
 The 20-mile strip from Buffalo to Niagara Falls will be eaten away and Lake Erie will rush through the St. Lawrence River into the Atlantic Ocean, leaving only rivers where Lakes Erie and Michigan now are, according to Professor James B. MacElwaine, professor of the geology and physics department of St. Louis university. But it won't be for 37,000 years.

The Great Lakes region is warping. This will bring about a drainage of the lakes through Chicago river and Maumee, he said.

With the Fingers! Says Corns Lift Out Without Any Pain

Sore corns, hard corns, soft corns or any kind of a corn can shortly be lifted right out with the fingers if you will apply directly upon the corn a few drops of freezeone, says a Cincinnati authority.
 It is claimed that at small cost one can get a quarter of an ounce of freezeone at any drug store, which is sufficient to rid one's feet of every corn or callus without pain or soreness or the danger of infection.
 This new drug is an ether compound, and while sticky, dries the moment it is applied and does not inflame or even irritate the surrounding tissue.
 This announcement will interest many women here, for it is said that the present high-heeled footwear is putting corns on practically every woman's feet.

Zeal is very blind, or badly regulated when it encroaches upon the rights of others.

The trouble with most handsome women is that they think that is all that is necessary.

Youth and Age

THERE is no time in woman's life that she cannot benefit by the use of Dr. Chase's Nerve Food in order to keep up the supply of pure, rich blood and to ensure a healthful condition of the nervous system.

Headaches, neuralgia, sleeplessness, nervous apathy, irritability, tired, worn-out feelings, soon disappear when the vigor and energy of the nerves are restored by the use of this great food cure.

50 cents a box, 6 for \$2.75, all dealers, or Edmundson, Bates & Co., Ltd., Toronto.

XMAS DELICACIES

Christmas is only about 4 weeks away, almost time to prepare the Xmas cooking. You know the Xmas cake always tastes better when about a month old. Expect Old Santa will be pretty slim with his presents this time, so all the more reason to make the Xmas Dinner a rousing success. Let us help you by supplying the best Groceries obtainable.

Seedless Raisins are again on the market. Our Delmonte and Griffin brands are sure beautiful stock.

Currants. New pack currants have also arrived. These have been off the market for months and will be all more appreciated.

Mince-meat. Wetheys Mince-meat cannot be beaten for pies, as only pure ingredients are used. Try a packet with next order.

Peels. Have been scarce. Have some in stock and more on the road. Do not delay ordering Peels as supply is limited.

Cranberries. Xmas without cranberries! We have the Jerseys in the late keepers, will keep till after Xmas, 2 lbs for 45c.

Figs. Last year we could not get a fig. We have these booked for Dec 1. Supply will be limited, so don't delay.

Spices. All kinds to put the spice in that Xmas pudding. Molasses. Do you make your own candy? Domolco Brand makes lovely clear candy. Just try. Home-made candy beats the bought kind any time.

Do not forget that we will have all kinds of Nuts, Candies, Jap Oranges Bon-Bons, etc. early in December.

Apples. You have all heard of the O.K. brand apples. These are the finest fruit we have ever seen. Apples are cheap at to-day's prices No 1 are \$3.75.

CHINOOK BREEZES

Curling will be king during the present winter months.

During the past week, we have had some real changeable Alberta weather—10 and 40 below zero to 10 above in a few days.

Will any ladies who have Red Cross sewing in their homes leave the same as soon as possible at the home of Mrs. Black

The will be program, box social and dance at the Peyton school-house on Friday, Dec. 26. Everyone is cordially invited to come and enjoy the evening.

On Monday, Messrs. Gilbertson, Boyer, Robinson and H. Meade were nominated for the Chinook village council. As only three are needed this will necessitate an election.

Miss Crane, who has been visiting her cousin, Mr. Richard Stewart, and other friends during the past two months, returned to her home in Toronto, Ont., last week.

Over twenty farmers were in town yesterday to see the government agent with a view of getting relief. There were some very needy cases among the applicants.

On Tuesday, Dec. 23rd, at 8 p.m., a Christmas tree and concert will be given by the children of the Chinook Sunday and public schools, in the auditorium of con. school. This promises to be a very enjoyable evening, both to the young and old. All are welcome.

Mr. T. H. White of White-lands, Cereal, has been showing some of his famous turkeys, geese and fowls at the Calgary poultry show last week, carrying off 18 prizes and two specials. Mr. White informs us that he is taking these prize-winning birds to the Edmonton poultry show, where, doubtless, they will be successful in winning more prizes.

The Womens' Institutes of Alberta have organized a relief fund for those who are in need due to repeated crop failures. The branch at Chinook are asking for any clothing and bedding that can be spared by people of the district, to be left at the home of Mrs. Whitlock by Saturday, Dec. 13th. A box will then be made up and sent to the Womens' Institute Relief Depot, Calgary, to be distributed.

VILLAGE OF CHINOOK

ELECTION OF COUNCILLORS for year 1920

Notice is hereby given, that an Election for three Councillors for Village of Chinook, for the year 1920, will be held on Monday, Dec. 8th, 1919, at the Council Chamber, Chinook, from 8 o'clock p.m. to 10 o'clock p.m.

SHEEP ON THE FARM

(Continued from page 1)

any other stock. It has always been that the sheep man is better off than his neighbor.

With regard to fencing, it was only necessary to hold sheep off growing crops for two or three months during which time they could be run on fall rye to the end of June. He did not think it necessary to fence against the coyotte, in fact, it would only be necessary to fence about 10 or 15 acres.

Speaking with regard to credit he did not think the farmers would have any difficulty of raising the credit necessary to start and they should use their credit resources to start a small flock of sheep on their farms.

Of the breeds of sheep, these were divided into two main classes, the English and Spanish. The English were the mutton breeds while the Spanish produced a short fine wool. The English classes consisted of medium wool producers and heavy wool. Of the two the medium wool was the more popular, and the medium wool, black faced sheep was the best adapted to the country and was the best to improve range stock. The Oxfords were standing up better than any other kind in the province. He did not advise Suffolks, as they were not sufficiently protected about the head against cold.

Referring to the limitations of the district, he said that we can't use an unlimited amount of stock, and that a small flock of heep was more adapted to the country than any other stock.

Most farmers were looking forward to the prospects of a big crop, but it was better to have many little sources of revenue.

Farmers Buy Ford Trucks Because

they save labor, save time, save money.

The Ford Truck is the most general-purpose implement on the farm.

The farmer can get his breakfast at home, take his produce to market, and be home again for dinner.

He can command the highest prices for his vegetables and fruit because he gets them to market while the dew is still on them.

He can take his hogs, sheep and other stock to market, as well as haul roots, potatoes and apples from the field.

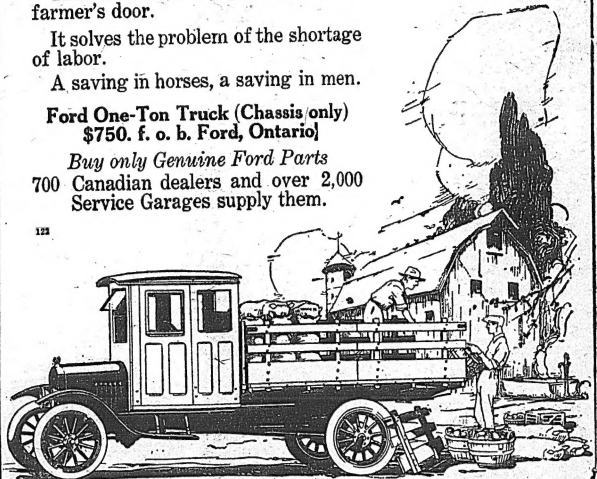

The Ford Truck brings the city to the farmer's door.

It solves the problem of the shortage of labor.

A saving in horses, a saving in men.
